FILED
FEB 26 2010
MISSISSIPPI
SECRETARY OF STATE

Date Rule Proposed: December 6, 2007

Name of proposed rule being terminated:

SPA2005-013 Outpatient Hospital Reimbursement Methodology

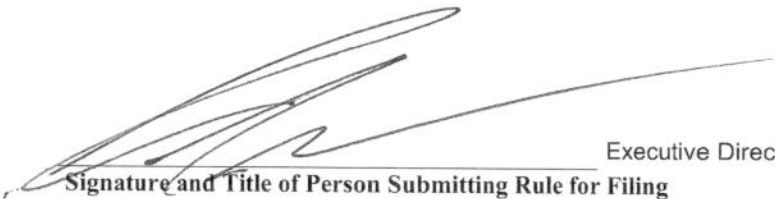

Explanation of the purpose of the proposed rule and the reason(s) for proposing the rule:

This State Plan Amendment was originally filed to allow the Division of Medicaid to change the outpatient hospital reimbursement methodology to a more efficient method whereby rates are trended forward annually. This was originally filed with the Secretary of State on September 30, 2005. That version was withdrawn on December 6, 2007 and refiled on December 6, 2007. Again, an update was filed on July 11, 2008, with that version being withdrawn on July 31, 2008. Another update was filed on August 5, 2008 and withdrawn on September 10, 2008. The intent of this filing is to withdraw all previous filings regarding transaction number SPA2005-013.

Reason(s) for terminating the proposed rule:

The Division is moving away from cost based reimbursement to an APC fee schedule for hospital outpatient services.

Date Proposed Rule Terminated: February 26, 2010

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE: MISSISSIPPI

METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES –
OTHER TYPES OF CARE

Outpatient Hospital Services –Prior to January 1, 2008

Outpatient hospital services shall be reimbursed at a percentage of billed charges unless specified differently elsewhere in this Plan. The percentage paid is the lower of 75% of charges or the cost to charge ratio, as computed by Medicaid using the hospital's cost report. The cost to charge ratio shall be computed each year for use in the following rate year's payments. Adjustments to outpatient services claims may be made if the cost to charge ratio is adjusted as a result of an amended cost report, audit, or Medicare settlement. The cost to charge ratio for outpatient services will be computed under Title XVIII (Medicare) methodology, excluding bad debts and other services paid by Medicaid under a different rate methodology (i.e., Rural Health Clinic services and Federally Qualified Health Center services). Out-of-state hospitals shall be reimbursed at the lower of 75% of charges or the average cost to charge ratio of hospitals located in Mississippi for their classification, as computed by Medicaid.

Medicaid Upper Payment Limit

In addition to the reimbursement methodology described above, hospitals located within Mississippi may be reimbursed in accordance with the applicable regulations regarding the Medicaid upper payment limit. For each specified class of hospital (State government-owned or operated facilities, non-State government-owned or operated facilities, and privately owned and operated facilities), the amount that Medicare would have paid for the previous year will be calculated and compared to the payments actually made by Medicaid during that same time period. This calculation may then be used to make payments for the current year to hospitals eligible for such payments in accordance with applicable regulations regarding the Medicaid upper payment limit. Up to 100 percent of the difference between Medicaid payments and what Medicare would have paid may be paid to State government-owned or operated facilities, non-State government-owned or operated facilities, and privately owned and operated facilities, in accordance with applicable State and Federal laws and regulations, including any provision specified in appropriations by the Mississippi Legislature.

Outpatient Hospital Services – Effective Beginning January 1, 2008

Outpatient hospital services shall be reimbursed on a prospective basis at a percentage of billed charges unless specified differently elsewhere in this Plan. The percentage paid is equal to the Medicaid cost to charge ratio, as computed by Medicaid, based on the hospital's Medicare cost report. The percentage paid will be computed annually, unless this plan requires a rate being calculated at another time, for the period October 1 through September 30. Cost reports used to calculate the percentage will be the cost report filed for the period ending in the second preceding federal fiscal year. For example, the percentage effective October 1, 2009, will be based on the most recent cost report filed with a reporting year end as of or prior to December 31, 2007, unless a short period cost report is required for a new provider.

Date Approved _____ TN

Date Effective January 1, 2008

Percentages for new providers, including changes of ownership, will be set at the average outpatient percentage of hospitals located in Mississippi, as determined by the Division. The outpatient percentage computed based on the hospital's initial Medicare cost report, using the attached protocol, will be effective retroactive to the effective date of enrollment.

Out-of-state hospitals shall be reimbursed at the average outpatient reimbursement rate of hospitals located in Mississippi, as determined by the Division.

Laboratory and Radiology Services

All outpatient laboratory services shall be reimbursed on a fee-for-service basis.
All outpatient radiology services shall be reimbursed on a fee-for-service basis.

Hospital-Based Clinics

Hospital-based clinics may not bill facility fees on the UB-04, unless they are a teaching hospital with a resident-to-bed ratio of .25 or greater.

5% Reduction

Notwithstanding any other provision of this section, the Division of Medicaid, as required by State law, shall reduce the rate of reimbursement to providers for any service by five percent (5%) of the allowed amount for that service.
