

Section: Third Party Liability

6.11 Third Party Sources

Third party sources that must be used to reduce Medicaid program costs include, but are not limited to, the following:

- Medicare Parts A, B, C and D. Medicaid considers Medicare Part D payments for prescription drugs to be considered payment in full.
- Health insurance includes both reimbursement and indemnity policies that provide payment because medical care and/or service are rendered. Indemnity policies that restrict payment to periods of hospital confinement are considered a third party resource. Policies that provide income supplementation for lost income due to disability (without regard to hospital confinement), or policies that make payment for disability (without regard to hospital confinement), such as weekly disability policies, are not third party sources.
- Major medical, dental, drug, vision care or other supplements to basic health insurance contracts.
- CHAMPUS, which provides coverage for off-base medical services to dependents of uniformed services personnel, active or retired.
- Veterans Administration (CHAMP-VA), which provides coverage for medical services to dependents of living and deceased disabled veterans.
- Railroad Retirement.
- Automobile Medical Insurance.
- Workers' Compensation.
- Liability Insurance—including automobile insurance and other public liability policies, such as home accident insurance, etc.
- Family health insurance carried by an absent parent.
- Black Lung Benefits.
- United Mine Workers of America Health and Retirement Fund.
- Donated funds.
