

SERVICES OF THE MISSISSIPPI MEDICAID PROGRAM

MISSISSIPPI DIVISION OF
MEDICAID

Managed Care:

On January 1, 2011, the Division of Medicaid implemented the MississippiCAN Program for selected high-risk beneficiaries. Beneficiaries are enrolled with one of two currently contracted CCOs, through which they access covered MississippiCAN Program services.

After successfully implementing this initial phase of the program and receiving Legislative approval in spring 2012 to enroll up to forty-five percent (45%) of Medicaid beneficiaries in managed care delivery systems, the Division expanded MississippiCAN in December 2012 to include additional populations and services.

Please see the MississippiCAN Program website for additional information, which is available at: <http://www.medicaid.ms.gov/mscan/Welcome.aspx>.
