

MISSISSIPPI DIVISION OF MEDICAID
OFFICE OF THE GOVERNOR
DRUG UTILIZATION REVIEW BOARD
AGENDA

February 17, 2011

Welcome	Mark Reed, M.D.
Incoming DUR Vendor Introductions	Judith Clark, R.Ph.
Old Business	Mark Reed, M.D.
Approval of Meeting Minutes	
Resource Utilization Review	Kyle D. Null, Pharm.D., M.S.
Discussion of Format Changes	
Pharmacy Program Update	Judith Clark, R.Ph.
New Business	Kyle D. Null, Pharm.D., M.S.

Criteria for Identifying “Medically-Accepted Indications” for PA Decisions
Developing Protocols for Specialty, Orphan and Ultra-Orphan Drugs
Coordination of Pharmacy and Medical Claims for Drug Products

Addenda

Initial Core Set of Health Quality Measures for Medicaid
Updated Guidelines Call for Pradaxa

Next Meeting Information	Mark Reed, M.D.
--------------------------	-----------------

Initial Core Set of Health Quality Measures for Medicaid-Eligible Adults

Background

President Obama signed into law the Patient Protection and Affordable Care Act on March 23, 2010, which mandates that the Secretary of Health and Human Services (HHS) identify and publish a recommended initial core set of health quality measures for Medicaid eligible adults for public comment. These adult health quality measures consist of measures which are in use in both public and privately sponsored health plans and were identified by the National Advisory Council of the Agency for Healthcare Research and Quality (AHRQ).

Implementation Timeline

In addition, the Affordable Care Act mandates that HHS should complete the following actions:

—By January 1, 2012:

- Establish a Medicaid Quality Measurement Program to fund development, testing, and validation of emerging and innovative evidence-based measures.

—By January 1, 2013:

- Develop a standardized reporting format on the core set and procedures to encourage voluntary reporting by the States.

—By January 1, 2014:

- Annually publish recommended changes to the initial core set that shall reflect the results of the testing, validation, and consensus process for the development of adult health quality measures.

—By September 30, 2014:

- Collect, analyze, and make publicly available the information reported by the States as required in section 1139B(d)(1) of the Act.

DUR Board Involvement

Of the 51 proposed health quality measures, eight are appropriate for monitoring under the purview of the DUR Board. See the attached Federal Register excerpt from December 30, 2010.

Educational Interventions

As outlined in 42 CFR § 465.711, Medicaid is charged with providing ongoing educational outreach programs using DUR Board data on common drug therapy problems. The educational outreach includes disseminating patient- or drug-specific information (or both) to health care practitioners. The overall purpose of the educational outreach is to improve prescribing and dispensing practices.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

[CMS-2420-NC]

Medicaid Program: Initial Core Set of Health Quality Measures for Medicaid-Eligible Adults

AGENCY: Office of the Secretary, HHS.

ACTION: Notice with comment period.

SUMMARY: This notice identifies an initial core set of health quality measures recommended for Medicaid-eligible adults, as required by section 2701 of the Affordable Care Act, for voluntary use by State programs administered under title XIX of the Social Security Act (the Act), health insurance issuers and managed care entities that enter into contracts with Medicaid, and providers of items and services under these programs. This notice also solicits comments on these initial measures, on facilitating the use of these measures by States and on identifying priority areas for measure enhancement and development.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on March 1, 2011.

ADDRESSES: Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of two ways (please choose only one of the ways listed):

1. *Electronic Mail.*

medicaidadultmeasures@ahrq.hhs.gov.

2. *Regular Mail.* Agency for Healthcare Research and Quality, Attention: Nancy Wilson, Immediate Office of the Director, Room 3028, 540 Gaither Road, Rockville, MD 20850.

FOR FURTHER INFORMATION CONTACT:

Nancy Wilson, M.D., M.P.H., Coordinator of the Advisory Council Subcommittee, at the Agency for Healthcare Research and Quality, 540 Gaither Road, Rockville, MD 20850, (301) 427-1310. For press-related information, please contact Karen Migdail at (301) 427-1855.

SUPPLEMENTARY INFORMATION:

I. Background

On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act (Affordable Care Act) (Pub. L. 111-148). Section 2701 of the Affordable Care Act added new section 1139B to the Social Security Act (the Act); section 1139B(a) of the Act now mandates that the Secretary of Health and Human Services (HHS) identify and publish for public comment a recommended initial core set of health quality measures for Medicaid eligible adults. Section 1139B(b) of the Act, as added by section 2701 of the Affordable Care Act, requires that a recommended initial core set be published for public comment by January 1, 2011, and that an initial core set be published by January 1, 2012.

In addition, the Affordable Care Act mandates that HHS should complete the following actions

—By January 1, 2012:

- Establish a Medicaid Quality Measurement Program to fund development, testing, and validation of emerging and innovative evidence-based measures.

—By January 1, 2013:

- Develop a standardized reporting format on the core set and procedures to encourage voluntary reporting by the States.

—By January 1, 2014:

- Annually publish recommended changes to the initial core set that shall reflect the results of the testing, validation, and consensus process for the development of adult health quality measures.

—By September 30, 2014:

- Collect, analyze, and make publicly available the information reported by the States as required in section 1139B(d)(1) of the Act.

Additionally, the statute requires the initial core set recommendation to consist of existing adult health quality measures that are in use under public and privately sponsored health care coverage arrangements or are part of reporting systems that measure both the presence and duration of health insurance coverage over time and that may be applicable to Medicaid-eligible adults.

II. Method for Determining Proposed Initial Core Set of Adult Health Quality Measures

The Affordable Care Act parallels the requirement under title IV of the Children's Health Insurance Program Reauthorization Act (Pub. L. 111-3) to identify and publish a recommended initial core set of quality measures for children in Medicaid and the Children's

Health Insurance Program. A similar process was used to identify the proposed initial core set of adult health quality measures. To facilitate an evidence-based and transparent process for making recommendations, the National Advisory Council of the Agency for Healthcare Research and Quality (AHRQ) created a subcommittee (the Subcommittee) for identifying quality measures for Medicaid-eligible adults. The Subcommittee consisted of State Medicaid representatives, health care quality experts, and representatives of health professional organizations and associations. The Subcommittee held a public meeting October 18th and 19th and considered public comments. The Subcommittee's advice was reported to the Chair of AHRQ's National Advisory Council and considered further by the Centers for Medicare & Medicaid Services (CMS) and staff in the Office of the Secretary of HHS prior to this public posting.

The initial core set was developed by reviewing measures from nationally recognized sources, including measures currently endorsed by the National Quality Forum (NQF), measures submitted by Medicaid medical directors, measures currently in use by CMS, and measures suggested by the Co-Chairs and members of the Subcommittee of AHRQ's National Advisory Council.

In prioritizing measures, the Subcommittee considered the needs of adults (ages 18 and older) enrolled in Medicaid. To help guide the discussion of priority health needs within the adult populations covered by Medicaid, the Subcommittee was divided into four workgroups—Maternal/Reproductive Health, Overall Adult Health, Complex Health Care Needs, and Mental Health and Substance Use. The workgroups considered potential measurement opportunities across the Institute of Medicine's (IOM) eight domains of quality: Safe, timely, effective, efficient, access, patient and family centeredness, care coordination, and infrastructure capabilities for health care. The Subcommittee also considered how health care equity and value (also from the IOM) could be reflected in the initial measurement set. Ultimately, the Subcommittee used the following three criteria in voting on the recommended measures for the core set:

- The scientific acceptability of measure properties.
- Feasibility of use by Medicaid.
- Importance to Medicaid programs.

The Subcommittee also considered whether the measures were currently used in other Medicaid quality

measurement efforts (for example, three maternity care measures included in the initial core set of children's quality measures, and measures designated for inclusion in the Medicare and Medicaid Electronic Health Record Incentive Payment Programs). The Subcommittee identified many measures that were cross-cutting and relevant to the entire adult Medicaid population. In the end, the Subcommittee identified a set of 51 measures to recommend as the initial core set of adult quality measures.

We are now soliciting public comments on the recommended initial core set of adult quality measures. Specifically, we seek comment on whether any measures should be added or deleted from the initial core set, the reporting burden, which measures may need further development, and the types of technical assistance and other resources States may need to implement these measures. We also are interested in feedback on how many measures are feasible and realistic for a State to collect and use in its monitoring of quality of care. We are trying to strike a balance between the need for State data to monitor and improve quality and an interest in minimizing the reporting burden on States and providers by aligning with other quality reporting and incentive initiatives.

HHS will be making improvements and enhancements to the core set as a result of public comments on the initial recommended core measure set. To further these efforts, AHRQ and CMS are working to identify ways to align State reporting requirements with other HHS quality reporting initiatives and requirements; coordinate quality

measurement efforts with payment reform strategies, health information technology, and electronic health record initiatives; and identify priority areas for the development of new measures. States will also receive technical assistance to facilitate implementation of the measures. The initial core set of adult quality measures, as required by the Affordable Care Act, will serve as the groundwork for creating a standardized approach to better understand the quality of care adults in Medicaid receive, improve how this care is measured, and create opportunities to impact health outcomes.

III. The Draft Initial Core Set of Health Quality Measures for Medicaid-Eligible Adults

The list of measures in the accompanying table of measures was developed on the basis of advice from the Subcommittee. For additional information, see the background paper at <http://ahrq.hhs.gov/>.

Respondents commenting on the measurement set are encouraged to:

- Specify which of the measures are being addressed.
- Explain the reasoning behind their comment.

In addition, we invite comments on ways to enhance the initial core set of measures so they can be implemented efficiently and accurately across all Medicaid programs, providers, and enrollees.

IV. Collection of Information Requirements

This document does not impose information collection and record-

keeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

V. Regulatory Impact Statement

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

Authority: Sections XIX and XXI of the Social Security Act (42 U.S.C. 13206 through 9a).

Dated: November 17, 2010.

Donald M. Berwick,

Administrator, Centers for Medicare & Medicaid Services.

Approved: December 20, 2010.

Kathleen Sebelius,

Secretary, Health and Human Services.

Measures Recommended for Initial Core Set of Health Quality Measures for Medicaid-Eligible Adults

This table of the recommended initial core measure set includes National Quality Forum (NQF) identifying numbers for measures that have been endorsed, provides the measure owners, and indicates those measures that have been designated for inclusion in the Medicare & Medicaid Electronic Health Record Incentive Payment Programs for eligible health care professionals and hospitals that adopt certified Electronic Health Record technology under the Final Rule published in the July 28, 2010 **Federal Register** (75 FR 44314).

Number	NQF ID†	Measure owner	Measure name	EHR‡
Prevention & Health Promotion				
1	0039	NCQA	Flu Shots for Adults Ages 50–64 (Collected as part of HEDIS CAHPS Supplemental Survey).

51	NA	NCQA	Prenatal and Postpartum Care: Postpartum Care Rate	

† NQF ID National Quality Forum identification numbers are used for measures that are NQF-endorsed; otherwise, NA is used.

‡ EHR Measures with an “X” are included in the Medicare and Medicaid Electronic Health Record Incentive Payment Program and may be collected through electronic health records. Specifications for these measures are available from the Centers for Medicare & Medicaid Services Web site at: http://www.cms.gov/QualityMeasures/03_ElectronicSpecifications.asp#TopOfPage.

Updated Guidelines Call for Pradaxa (dabigatran) to be used in Place of Warfarin in Certain Patients

Background

Updated guidelines from the American College of Cardiology, the American Heart Association and the Heart Rhythm Society call for Pradaxa (dabigatran) – approved by the FDA in December 2010 – to be used as an alternative to warfarin to reduce the risk of blood clots and stroke in patients with paroxysmal or permanent atrial fibrillation. According to the guidelines, Pradaxa (dabigatran) may be substituted in patients currently on warfarin given that they do not have a prosthetic heart valve, significant heart disease, severe renal failure or advanced liver disease.

Brief Analysis of Mississippi Medicaid Data

Number of Patients with a claim for:

Month	Warfarin	Pradaxa (dabigatran)	Both
December 2010	1,111	11	3
January 2011	851	7	1
February 2011 (partial)	430	3	0
