

Letter to Governmental Affairs representatives:

In order to protect the integrity of the P&T Committee, the Division of Medicaid is asking for your cooperation in refraining from conducting presentations or disseminating marketing information to members of the committee outside of the normal committee meetings and procedures. The agency has worked very diligently to create an atmosphere that is conducive to the open exchange of information which allows for members to make unbiased and informed decisions based on safety and efficacy. The Committee allows time for industry representatives to present information concerning their particular product during the open committee meeting. Gatherings of members and industry representatives at which official business is discussed risk running afoul of the Mississippi Open Records Act.

The DOM appreciates your cooperation and attention to this matter.
