

## INSTRUCTIONS FOR FILING LONG-TERM CARE FACILITY COST REPORT

### Instructions

The cost reporting forms and schedules described below must be used by all Mississippi long-term care facilities participating in the Mississippi Medicaid Program (Title XIX). Medicare (Title XVIII) cost reporting forms are not acceptable in lieu of these forms. Hospital-based facilities and state-owned facilities which use the Medicare forms for step-down in completing their cost report must submit a copy of the applicable Medicare cost report forms.

### General Information

These instructions are for use in the preparation and submission of the cost report to the Division of Medicaid (DOM) by all Mississippi long-term care facilities providing care and services under the Medical Assistance Program, including nursing facilities (NF), intermediate care facilities for individuals with intellectual disabilities (ICF-IID) and psychiatric residential treatment facilities (PRTF).

The annual reports are the basis for determining reimbursement rates. A copy of all reports and statistical data must be retained by the facility for no less than three years following the date reports are submitted to the Division of Medicaid. **All dollar amounts must be rounded to the nearest dollar and must foot and cross-foot. Only per diem cost amounts will not be rounded.** Cost reports submitted that have not been rounded in accordance with this policy will be returned to the provider and will not be considered as received until they are re-submitted.

### Annual Reporting

Reports are to be filed with the Division of Medicaid on or before the last day of the fifth month following the close of the provider's reporting period. Should the due date fall on a Saturday, Sunday, State of Mississippi holiday or federal holiday, the due date shall be the following business day.

The cost reports must be mailed or delivered to:

Bureau of Reimbursement  
Division of Medicaid  
Office of the Governor  
Suite 1000, Walter Sillers Building  
550 High Street  
Jackson, MS 39201

**INSTRUCTIONS FOR FILING  
LONG-TERM CARE FACILITY COST REPORT**

The following documentation must be submitted with the cost reports:

- (a) working trial balance(s) of all entities reported on the cost report forms with the appropriate cost report line numbers, including approved ventilator dependent care (VDC) patient services, to which each account can be traced. This should be done by running a trial balance in cost report line number order that subtotals the accounts by cost report line number. The subtotals should tie to each cost report line;
- (b) depreciation schedule(s). If the facility has different book and Medicaid depreciation schedules, copies of both depreciation schedules must be submitted. If the facility has home office costs, a copy of the home office depreciation schedule must also be submitted. All hospital-based facilities must submit a depreciation schedule that clearly shows and totals assets that are hospital only, NF only and shared assets. All Medicaid-basis facility depreciation schedules must be sorted by the asset categories on Form 7 and subtotaled by year of acquisition;
- (c) amortization schedule(s), if applicable;
- (d) narrative description of purchased management services or a copy of contracts for managed services, if applicable;
- (e) a description of the basis used to allocate the home office or related management company costs to providers of the group and to non-provider activities, if applicable, and a copy of the cost allocation worksheets;
- (f) hospital-based and state facilities must submit all allocation worksheets. The Medicare schedules that must be submitted for facilities using the Medicare forms for allocation are: Worksheet A, Reclassification and Adjustment of Trial Balance of Expenses; Worksheet A-6, Reclassifications; Worksheet A-7, Capital Analysis and Reconciliation; Worksheet A-8, Adjustments to Expenses; Worksheet A-8-1, Statement of Costs of Services From Related Organizations; Worksheet B, Part 1, Cost Allocation - General Service Costs; **Worksheet B, Part II, Allocation of Capital Related Costs**, and Worksheet B-1, Cost Allocation - Statistical Basis.

Cost reports must be submitted on or before the due date in order to avoid a penalty in the amount of \$50.00 per day each day the cost report is delinquent. The submission date will be verified by postmark, delivery ticket, or date hand delivered.

**INSTRUCTIONS FOR FILING  
LONG-TERM CARE FACILITY COST REPORT**

When it is determined that a cost report does not include the checklist, all required forms and schedules, and documentation listed in items (a) through (f) of this section, the provider will be notified. The provider must submit a complete cost report. If the request is made and the completed cost report is not received on or before the due date of the cost report, or is not received within 24 hours of the request if made after the due date, the provider will be subject to the penalties for filing delinquent cost reports.

When it is determined that additional information is needed, providers will be allowed a specified amount of time to submit the requested information without incurring the penalty for a delinquent cost report. For cost reports which are submitted by the due date, ten (10) working days from the date of the provider's receipt of the request for additional information will be allowed for the provider to submit the additional information. For cost reports which are submitted after the due date, five (5) working days from the date of the provider's receipt of the request for additional information will be allowed for the provider to submit the additional information. If requested additional information has not been submitted by the specified date, an additional request for the information will be made and five (5) working days from the date of the provider's receipt of the request for additional information will be allowed for the provider to submit the additional information. An exception exists in the event that the due date comes after the specified number of days for submission of the requested information. In these cases, the provider will be allowed to submit the additional requested information on or before the due date of the cost report. Information that is requested that is not submitted following either the first or the second request may not be submitted and be considered for reimbursement purposes. Providers will not be allowed to submit the information at a later date, at the time of financial review, the cost report may not be amended in order to submit the additional information, and an appeal of the disallowance of the costs associated with the requested information may not be made. Allowable costs will be adjusted to disallow any expenses or cost findings that are not submitted.

**Accounting Basis**

The report must be prepared on the accrual basis of accounting. If a facility is on a cash basis, it will be necessary to convert from a cash to an accrual basis for reporting purposes. This does not apply to governmental facilities.

Particular attention must be given to an accurate accrual of all costs at the end of the reporting period for the equitable distribution of costs to the applicable period. Care must be given to the proper allocation of costs for service and maintenance contracts to the period covered by such contracts. Care should be given to a proper cutoff of accounts receivable and accounts payable both at the beginning and ending of the

**INSTRUCTIONS FOR FILING

reporting period. Amounts earned although not actually received and amounts owed to creditors but not paid must be included in the reporting period.

Supporting Information

Providers are required to maintain adequate financial records and statistical data for proper determination of reimbursable costs. The report is based on financial and statistical records which must be maintained by the facility for three (3) years from the date submitted to the Division of Mississippi. Cost information must be current, accurate, and in sufficient detail to support the claim for reasonable cost-related reimbursement. This includes all ledgers, journals, records, and original evidences of cost (canceled checks, purchase orders, invoices, vouchers, inventories, time cards, payrolls, bases for apportioning costs, etc.) which pertain to the determination of reasonable cost. Census data on the cost report must be supported by daily census records, patient's charts, etc. Such information must be adequate and available for auditing.

Amended Cost Reports

The Division of Medicaid accepts amended cost reports for a period of thirty-six (36) months following the end of the reporting period. Form 1, Section II must be completed on all amended cost reports in order to explain the reason for the amendment. Form 2 with an original signature certifying that the amended information is correct and all amended supporting related information must be submitted. Each form and schedule submitted must be clearly marked "Amended". Amended cost reports submitted after the annual base rate is determined will be used only to adjust the individual provider's rate, if necessary. Amended cost reports will not be accepted for the following: a) on or after the date that Medicaid financial review field work begins, b) to submit additional information for costs previously disallowed due to failure to respond to a request for information, or c) for submission of detailed expense descriptions for which costs were disallowed because non-acceptable descriptions were used.

Schedules must list assets by purchase date within asset groups and departments and must be subtotaled by year of acquisition.

The schedule is required after the conclusion of each calendar year. This schedule, if submitted, will be used in computing the fixed asset additions for the gross rental per diem calculation.

**Allocation of Owners' Salaries between facilities should be calculated following these guidelines:**

Total hours used in the calculation must be no more than sixty (60) and no less than forty (40). The allocation of hours to each facility may be calculated using the expense allocation factor. When the various facilities differ in classification, the limit applicable to each facility classification should be used and allocated.
