Systems Change and Capacity Building
The Arc of Mississippi

Thank you for this opportunity Ms. Wilson. My comments are brief.

Page 53 of 198 under Supervised Living states “Each person must have control over his/her personal resources. Providers cannot restrict access to personal resources. Providers must offer informed choice of the consequences/risks of unrestricted access to personal resources. There must be documentation in each person’s record regarding all income received and expenses incurred.”

On behalf of The Arc of Mississippi I would like to suggest DOM adds language that also makes sure each person receives a monthly or quarterly accounting of their income and expenses so they will be aware of their resources which is necessary to build capacity and increase control/responsibility of their own finances.

Thank you Ms. Wilson. This concludes my comments.
