MMIS REPLACEMENT PROJECT

SUBMISSION OF EDI

TRANSACTION TIP SHEET

Step 2 - Submission of EDI Transactions

EDI Transaction Testing is conducted to verify the integrity of the format, not the integrity of the data. However, to simulate what will happen in production, Mississippi (MS) Medicaid Management Information System (MMIS) requests that Trading Partners send live transmission data to a non-production MS MMIS environment. More than one test transmission may be required depending on the number of format errors on a transmission and the relative severity of these errors. Future testing may be required to verify a) any changes made to the MS MMIS interChange system or b) any changes to the ANSI formats.

Trading Partner testing includes Health Insurance Portability and Accountability Act (HIPAA) compliance testing, as well as validating the use of conditional, optional, and mutually defined components of the transaction.

MS MMIS recommends that Trading Partners submit two successful and unique submissions and receive the associated 999 (accepted) acknowledgement in response to obtain approval from MS MMIS to promote to production.

User will need to test all ASC X12 transactions for which they have previously signed an agreement to submit/receive.

The sections below will detail creating and submitting EDI transactions to MS MMIS.

Creating Transaction(s)

1. Review the appropriate MS MMIS Companion Guides located at the following link: <u>EDI Technical</u> <u>Documents | Mississippi Division of Medicaid (ms.gov)</u>

2. Select a small current production file from user records for the test.

3. Change the environment indicator in interchange control segment 15 (ISA 15) From "P" to "T" (for "test transaction") in submission software.

4. Update the file based on the information in the appropriate MS MMIS Companion Guide.

Note: The Payer Identifier element has changed to "77032"—files will not process without this change.

5. Navigate to the **MOVEit URL** and the main landing page will be displayed:

Go to: Mississippi Replacement Project (msxix.net)

The registration confirmation email sent to the user by Gainwell Technologies contains a username and password as well as the URL for the Mississippi (MS) Medicaid Management Information System (MMIS) SFTP Server (MOVEit).

MOVEit – Logging in

1. Enter the username and password supplied on the kick-off email and click Sign On.

Note: When first logging in, an initial password change is required. The change password prompt will automatically display.

MOVEit	Enterprise Managed File Transfer - Made Easy
Progress MOVEIt [*] Transfe Enterprise Managed File Transf Made Easy	

- 2. Enter a password that adheres to the listed restrictions.
- 3. Re-type the new password
- 4. Click Change Password.

MOVEit - Setting Email Address

- 1. After the first login, click "My Account" on the far right, to set the user email address.
- 2. Enter an email address to receive EDI notifications and click Change Email Settings.

Note: The MSMMIS will send emails to this email address when files have been sent.

## **Step 3 - Certification**

All MS MMIS Trading Partners will be required to be "certified" through the completion of authorization testing. Completion of the testing process must occur prior to electronic submission of production transactions.

Upon successful completion of testing, the user's Trading Partner ID will be set to "production" status and transactions will be accepted via the production MOVEit.

**Note:** Users will need to register in the production Provider Portal after the testing phase. At that time, the user will register with a current submitter ID. The user ID will not contain the prefix "UAT".

Certification occurs internally in MS MMIS. The EDI team checks 835 claim inquiries and emails the trading partner confirmation of successful transactions and approves certification.

Page 12
