APPENDIX A – DEFINITIONS AND ACRONYMS 22

APPENDIX B – ANALYSIS 24

APPENDIX C – DATA ANALYSIS ASSUMPTIONS 25

The Mississippi Division of Medicaid (DOM) requires that each of the coordinated care organizations (CCOs) submit encounter data to the DOM's fiscal agent contractor (FAC), Conduent. To ensure complete encounter data is being received, Myers and Stauffer provides bi-monthly encounter reconciliations. As part of this process, Myers and Stauffer analyzes Medicaid encounter data that has been submitted by the CCOs to Conduent and completes a comparison of the encounters to cash disbursement journals provided by each CCO. For purposes of this analysis, "encounter data" are claims that have been paid by CCOs or delegated vendors (e.g., vision and pharmacy) to health care providers that have rendered health care services to members enrolled with the CCO.

Myers and Stauffer is working closely with DOM and the CCOs to identify deficiencies and propose solutions that will result in high quality and reliable encounter data being submitted and available to the state agency to measure and monitor its Medicaid managed care program. Validated encounter data has many uses such as utilization by actuaries as part of their rate setting analyses as well as fulfilling the federal reporting requirements related to the Medicaid Managed Care Rule, to provide program management and oversight, and for tracking, accounting, and other ad hoc analyses.

Section 11.S.6 of the contract between DOM and the CCO states,

"The Contractor shall submit at least ninety-eight percent (98%) of all Member Encounter Data in a valid format, which will be deemed valid by the Division, including those of Subcontractors or Delegated Vendors as provided for in this Section, both for the original and any adjustment or void. The Division or its Agent will validate Member Encounter Data submissions according to the Cash Disbursement Journal of the Contractor and any of its applicable Subcontractors. If the Contractor fails to submit complete Member Encounter Data, as measured by a comparison of encounters to cash disbursements, Contractor may be subject to liquidated damages as outlined in Section 16, Default and Termination, of this Contract... Ninety-eight percent (98%) of the records in the Contractor's encounter batch submission must pass X12 EDI compliance edits and the Mississippi Medicaid MMIS threshold and repairable compliance edits."

The bi-monthly encounter reconciliations also help fulfill part of the work requirements set forth in step number 3 of the Center for Medicare and Medicaid's (CMS) External Quality Review (EQR) Protocol 5 (formerly Protocol 4), which require a determination of the completeness, accuracy, and quality of the encounter data being submitted by each CCO. CMS' External Quality Review, Protocol 5, is an excellent way to assess whether the encounter data can be used to determine program effectiveness, accurately evaluate utilization, identify service gaps, and make strong management decisions. In addition, the Protocol evaluates both departmental policies, as well as the policies, procedures, and systems of the health plans to identify strengths and opportunities to enhance oversight. The full results of our Protocol 5 review have been issued as a separate report.

Our work was performed in accordance with American Institute of Certified Public Accountants (AICPA) professional standards for consulting engagements. We were not engaged to, nor did we perform, an audit, examination, or review services; accordingly, we express no opinion or conclusion related to the procedures performed or the information and documentation we reviewed. In addition, our engagement was not specifically designed for, and should not be relied on, to disclose errors, fraud, or other illegal acts that may exist.

The results of our engagement and this report are intended only for the internal use of the Mississippi Division of Medicaid (DOM), and should not be used for any other purpose.

MS UnitedHealthCare Community Plan Encounter and CDJ Comparison

SUMMARY

DOM requested that, for this study, we review the CCO's entire plan, each delegated vendor, and fee-for-service (non-vendor) paid encounters to determine if the paid encounters meet the state contract minimum completeness requirement of **98 percent** when compared to the CDJ files. The encounters and CDJ files utilized in this study met the following criteria:

- Encounters were paid within the reporting period of July 1, 2020 through June 30, 2022;
- CDJ transactions had payment dates within the reporting period of July 1, 2020 through June 30, 2022;
- Encounters were received and accepted by the FAC and transmitted to Myers and Stauffer through September 5, 2022.

**ENCOUNTER
DATA ANALYSIS**

For this study, Myers and Stauffer analyzes the encounter data that is submitted by the CCOs to the FAC’s subcontracted data warehouse vendor, Truven Health Analytics, and loaded into the FAC Medicaid Management Information System (MMIS). Encounters submitted by any CCO that were rejected by the FAC for errors in submission or other reasons are not transmitted to Myers and Stauffer.

Furthermore, Myers and Stauffer analyzes the encounter data from the FAC MMIS and makes the following adjustments. Tables C and D below outline the impact of applying these encounter analysis adjustments to the encounter paid amounts, when compared to the raw data received.

1. Medical and institutional encounter voids with positive plan paid amounts and invalid former TCN values are excluded from the encounter totals. Additionally, pharmacy encounters being identified as denied are excluded from the encounter totals.
2. Myers and Stauffer identified potential duplicate encounters using our encounter review logic. Based on a comparison to the CDJ files, we noted some are actual duplicate submissions, and some are replacement encounter records without a matching void (i.e. calculated voids). Lists of these potential duplicates, noted in previous reports, were provided to UHC for examination. We have reviewed UHC’s disputed duplicate response files submitted to us prior to August 26, 2022. The accepted responses have been incorporated into the analysis for this report. Responses requiring further explanation have not been added to this report and will be resubmitted to the CCO.
3. Our potential duplicate and calculated void process attempts to identify and remove encounters that appear to be duplicated for some reason. Encounters paid by the CCO, but denied by the FAC were included in both our potential duplicate and calculated void processes. It should be noted that the inclusion of denied encounters by either the FAC or the CCO can artificially inflate the percentages of encounter counts and paid amounts being removed. In the case of encounters denied by the FAC, some of these encounters may have already been identified and flagged by the FAC as being duplicates.

Table C — Myers and Stauffer LC's Adjustments to UHC CAN Encounters			
Description	Encounter Count	Paid Amount	Paid Amount (% of Total*)
Total Encounter Amount (FAC Reported)	13,772,988	\$1,464,365,776	100.00%
<i>Adjustment Type</i>			
<i>Denied</i>	<i>(1,887,577)</i>	<i>(\$2,353,550)</i>	<i>-0.16%</i>
<i>Calculated Void</i>	<i>(12,746)</i>	<i>(\$10,593,618)</i>	<i>-0.72%</i>
<i>Duplicate</i>	<i>(229)</i>	<i>(\$34,393)</i>	<i>0.00%</i>
<i>Total Adjustments Made</i>	<i>(1,900,552)</i>	<i>(\$12,981,560)</i>	<i>-0.88%</i>
Net Encounter Amounts	11,872,436	\$1,451,384,216	99.12%

Table D — Myers and Stauffer LC 's Adjustments to UHC CHIP Encounters			
Description	Encounter Count	Paid Amount	Paid Amount (% of Total*)
Total Encounter Amount (FAC Reported)	1,656,489	\$143,822,043	100.00%
<i>Adjustment Type</i>			
<i>Denied</i>	<i>(179,668)</i>	<i>(\$73,971)</i>	<i>-0.05%</i>
<i>Calculated Void</i>	<i>(8,616)</i>	<i>(\$757,539)</i>	<i>-0.52%</i>
<i>Duplicate</i>	<i>(10)</i>	<i>(\$1,499)</i>	<i>0.00%</i>
<i>Total Adjustments Made</i>	<i>(188,294)</i>	<i>(\$833,009)</i>	<i>-0.57%</i>
Net Encounter Amounts	1,468,195	\$142,989,035	99.43%

* - Percentage ratios are rounded down for each adjustment type and may not add up to the total percentage of adjustments made for this reporting period. Please see data analysis assumption number 8 on page 25 for further explanation.

During the course of this analysis, Myers and Stauffer identified potential data issues that may impact the completion percentages for specific delegated vendors and/or fee-for-service (non-vendor).

Please reference Tables 1 through 11 starting on page 9 for UHC's CAN and CHIP entire plan, delegated vendor, and fee-for-service (non-vendor) reconciliation period tables. These tables contain detailed reconciliation totals, completion percentages, and encounter analysis adjustments made by Myers and Stauffer.

Data issues and notes that currently may not impact compliance:

1. **Fee-for-Service (non-vendor) and Optum Behavioral Health (Tables 2 and 8):** We noted potentially misallocated fee-for-service, including behavioral health, paid amounts between months due to duplicate submissions of earlier encounters. The final paid amounts for the encounters appear to match the CDJ data totals with the use of potential duplicate identification logic. However, due to these potential submission issues, the payment amounts related to a claim sequence may be allocated to one month in the encounters and a different month in the CDJ transactions. This issue is causing the CAN encounter totals for some months (e.g., February 2021) to be understated and the encounter totals for some earlier months (e.g., August 2020), including those prior to the current report period, to be overstated.
 - **We recommend UHC continue to work with DOM to submit any outstanding encounter sequences.**
2. **OptumRx (Tables 3 and 9):** Several OptumRx monthly completion percentages for both CAN and CHIP are slightly above 100 percent. These inflated completion percentages appear to be due to potentially missing or misallocated pharmacy encounter sequences, particularly voids, when compared to the CDJ files. Pharmacy encounter voids that are allocated to the paid date of their replaced original records due to an MMIS limitation are contributing to these inflated monthly completion percentages.
 - We noted instances of mismatched paid dates when the OptumRx encounter data and CDJ files are compared. These mismatched paid dates appear to be causing the CHIP monthly completion percentages to fluctuate from above 100 percent for August 2021 to below 98 percent for September 2021. However, OptumRx implemented final paid date corrections for their on-going pharmacy encounter submissions in September 2021.
 - **We recommend that UHC work with DOM to submit any outstanding pharmacy encounter sequences, including voids.**
3. **UHC Dental (Tables 4 and 10):** The several inflated monthly completion percentages for CAN and CHIP dental appear to be due to potentially missing encounter sequences (specifically voids), when compared to the CDJ files.
 - Additionally, we noted instances of dental encounter adjustments submitted with original paid dates instead of the date the adjustments took place. This appears to be increasing the encounter totals, since the negative CDJ transactions are allocated to recent paid dates and the encounter adjustments are allocated to earlier months. In July 2021, UHC communicated that this issue has been corrected going forward due to a change in the way dental adjustment records are being provided to UHC for submission to the state.
 - **We recommend UHC continue to work to submit any potentially missing dental encounter sequences.**

MS UnitedHealthCare Community Plan Encounter and CDJ Comparison

4. **March Vision (Tables 5 and 11):** Several March Vision CAN and CHIP monthly completion percentages are slightly above 100 percent. This appears to be due to potentially missing or misallocated payment sequences, when the CDJ files and encounter data are compared. In particular, March Vision encounter voids being allocated to their original paid dates may contribute to the inflated monthly completion percentages.
 - Additionally, we noted a few instances of Vision CDJ transactions with a CAN program identifier and encounters with a CHIP submitter ID. This mismatched CAN/CHIP identifiers issue appears to be inflating the CHIP encounter totals for a few months in 2020, but has been corrected going forward.
 - **We recommend UHC continue to work with March Vision to submit any potentially missing payment sequences.**

APPENDIX A – DEFINITIONS AND ACRONYMS

The following terms are used throughout this document:

- **Calculated Void Encounter (CV)** – An encounter that Myers and Stauffer LC has identified as being a replacement encounter that does not appear to have a corresponding void of the original encounter in the FAC's data warehouse.
- **Cash Disbursement Journal (CDJ) Monthly Reported Total** – The sum of all payments from a CCO or delegated vendor to service providers for a given month as reported by the CCO to the DOM.
- **Children's Health Insurance Program (CHIP)** – This program provides insurance coverage for uninsured children up to age 19 whose family does not qualify for Medicaid and whose income does not exceed 200% of the federal poverty level. On January 1, 2015, CHIP became a coordinated care program with UHC and Magnolia Health responsible for coordinating services until October 31, 2019. Beginning on November 1, 2019, Molina Health and UHC became responsible for coordinating CHIP services.
- **Coordinated Care Organization (CCO)** – A private organization that has entered into a risk-based contractual arrangement with the Mississippi Division of Medicaid (DOM) to obtain and finance care for enrolled Medicaid members. CCOs receive a capitation or per member per month (PMPM) payment from the DOM for each enrolled member. Before October 1, 2018, two CCOs were operating in the state of Mississippi during the reconciliation period. They were Magnolia Health Plan (Magnolia Health) and UnitedHealthcare Community Plan (UHC). Effective October 1, 2018, Molina Healthcare joined the other two CCOs to provide services to enrolled members.
- **Conduent** - State fiscal agent contractor, formerly known as Xerox Health Solutions.
- **Fiscal Agent Contractor (FAC)** – A contractor selected to design, develop, and maintain the claims processing system (Medicaid Management Information System); Conduent (formerly known as Xerox Health Solutions) is the current FAC.
- **Medicaid Management Information System (MMIS)** – The claims processing system used by the FAC to adjudicate Mississippi Medicaid claims. CCO submitted encounters are loaded into this system and assigned a unique claim identifier.
- **Mississippi Coordinated Access Network (MississippiCAN)** – The state of Mississippi's Medicaid managed care program. There are three coordinated care organizations responsible for coordinating services for Mississippi Medicaid beneficiaries, effective October 1, 2018.
- **Mississippi Division of Medicaid (DOM)** – The division in the Office of the Governor that is responsible for administering Medicaid in Mississippi.
- **Monthly Completion Percentage** – The percentage of the monthly encounter total in relation to the CDJ monthly reported total.
- **Monthly Encounter Net Total** – The sum of the encounter submissions for a given month incorporating the Myers and Stauffer LC encounter data adjustments made to the encounter submissions stored in the FAC's encounter data warehouse.

MS UnitedHealthCare Community Plan Encounter and CDJ Comparison

- **Monthly Encounter Total (Adjustments)** – The sum of all Myers and Stauffer LC adjustments for a given month that were removed from the encounter submissions stored in the FAC’s encounter data warehouse.
- **Monthly Encounter Total (FAC Reported)** – The sum of all encounter submissions for a given month stored in the FAC’s encounter data warehouse.
- **Monthly Variance** – The difference between the monthly encounter total and the CDJ monthly reported total for a given month.
- **Potential Duplicate Encounter (PDUP)** – An encounter that Myers and Stauffer LC has identified as being a potential duplicate of another encounter in the FAC’s data warehouse.
- **Truven Health Analytics (Truven)** – Subcontractor to the state’s fiscal agent contractor responsible for the encounter data warehouse.

Encounters from institutional, medical, and pharmacy service types were combined on like data fields. We analyzed the information reported on each encounter to capture the amount paid on the entire claim. Encounter totals were calculated by summarizing the data by the CCO paid date, CCO identification number, and specific delegated vendor criteria. Each cash disbursement submitted by the CCO was summarized by paid date, CCO program identifier, and delegated vendor to create a matching table. These matching tables were combined using common fields and were used to produce the results.

Based on criteria provided by the CCO, we identified UHC encounters as follows:

❖ ***UHC CAN Encounters***

- Submitter ID equal to '91474' or MC Prov ID equal to '02821762' for medical and institutional encounters
- Pay to Provider Number equal to '02821762' or if the Pay to Provider Number is blank, Payer ID equal to '02821762' when the COB sequence number is one, for pharmacy encounters.

❖ ***UHC CHIP Encounters***

- Submitter ID equal to '93552' or MC Prov ID equal to '09974046' for medical and institutional encounters
- Pay to Provider Number equal to '09974046' or if the Pay to Provider Number is blank, Payer ID equal to '09974046' when the COB sequence number is one, for pharmacy encounters.

❖ ***UHC Dental – Dental Services***

- Claims Type Code value of 'D'.

❖ ***March Vision – Vision Services***

- Plan TCN has 8 characters and claim type is not T.
- First character of the Plan TCN is '1' or first two characters of the Plan TCN are 'MA'.
- Dates of service beginning on 1/1/2017.

❖ ***MTM – Non-Emergency Transportation (NET)***

- First three characters of the Plan TCN are 'MIS', 'UOM', 'UMM', or 'MMU'.
- Plan TCN or Patient Account Number field contains 'Q0' in the first and second positions and the third position does not contain a number.

❖ ***OptumRx – Pharmacy Benefit***

- These encounters are contained in separate data warehouse tables as a result of pharmacy encounter submissions processing.

❖ ***UHC – Fee-for-Service (Non-Vendor)***

- All other plan submitted encounters that do not meet the listed criteria. This includes UHC non-vendor (fee-for-service) and Optum Behavioral Health.

APPENDIX C – DATA ANALYSIS ASSUMPTIONS

1. We assume that all data provided to Myers and Stauffer is complete and accurate.
2. Voided encounter records contained within the encounter submissions were coded to match the associated adjustment's paid date to allow for the proper matching of cash disbursements that occurred due to this void transaction. However, we were unable to assign a paid date to the void transactions in which there was not an associated adjustment encounter. UHC submitted supplemental records for some of these encounter voids (e.g., OptumRx), which we used to allocate the encounter voids to the appropriate recoupment date.
3. We instructed the CCOs to exclude referral fees, management fees, and other non-encounter related fees in the CDJ data submitted to Myers and Stauffer.
4. Interest amounts do not appear to be included in the CCO paid amounts. We have therefore excluded the separately itemized interest expense from the CDJ totals.
5. There are adjustment instances in the encounter data where the associated backout/void record is successfully accepted and created. However, the corresponding replacement transaction is denied by the FAC, which may be impacting the monthly completion percentages.
6. National Med Trans (NET) was replaced by MTM as UHC's NET delegated vendor effective August 1, 2019. Since NMT is no longer an active vendor, DOM instructed Myers and Stauffer to remove National Med Trans from the vendor encounters and CDJ totals beginning with the December 2021 report and any subsequent reports.
7. There appear to be instances where the CCO submitted a paid encounter with a claim adjustment reason (CAS) code that was processed by the FAC as CCO-denied. This suggests that the FAC's denial adjustment reason code (ARC) table may not contain the same CAS codes that the CCO is intending to use to identify denied encounters. CSR DO16844 was completed in August 2018 to update the process to prevent setting the line and header statuses to deny if the MC encounter paid amount is present.
8. Percentage ratios noted in this report are rounded down. The sum of the percentages may not add up to the percentage sum totals (Tables A through D).
9. Opportunities for improving the encounter reconciliation process have been identified during the analysis of the encounter data and cash disbursement journals, as well as frequent interactions with the CCOs, their delegated vendors, DOM, and the FAC. While we have attempted to account for these situations, other potential issues within the data may exist that have not yet been identified which may require us to restate a report or modify reconciliation processes in the future.
