SUBMISSION AND/OR APPROVAL OF A DRUG PRIOR AUTHORIZATION REQUEST DOES NOT GUARANTEE MEDICAID PAYMENT FOR PHARMACY PRODUCTS OR THE AMOUNT OF PAYMENT. ELIGIBILITY FOR AND PAYMENT OF MEDICAID SERVICES ARE SUBJECT TO ALL TERMS AND CONDITIONS AND LIMITATIONS OF THE MEDICAID PROGRAM. **Confidentiality Notice:** This communication, including any attachments, is for the sole use of the intended recipient(s) and may contain confidential and privileged information. Any unauthorized review, use, disclosure or distribution is prohibited. If you are not the intended recipient, please contact the sender by reply telephone (1-833-660-2402) or fax (1-866-644-6147) and destroy all copies of the original message. 10/15/2024

NOTE: Synagis should only be administered if Beyfortus is not available. PA approval in such cases will be limited to children meeting these criteria.

If Beyfortus is unavailable, beneficiaries must meet at least one of the bullet point criteria for age at time of request.			
Age ≤ 1	1 year at start of RSV season and one of the	Age 12 – 24 months at start of RSV season and one of	
followi	ing:	the	
0 0 0 0	 Prematurity of ≤ 28 weeks 6 days gestation Documentation of chronic lung disease (CLD) of prematurity (defined as gestational age of 29 weeks 0 days – 31 weeks 6 days AND requirement for > 21% oxygen or chronic ventilator therapy for at least the first 28 days after birth). Documentation of hemodynamically significant congenital heart disease (CHD) AND one of the following: acyanotic heart disease receiving medication for congestive heart failure AND will require cardiac surgery moderate to severe pulmonary hypertension documentation of cyanotic heart disease through consultation with pediatric cardiologist Documentation of congenital abnormalities of the airway OR neuromuscular disease that impairs the ability to clear secretions from the upper airway because of ineffective cough Documentation of cystic fibrosis AND clinical evidence of CLD (defined as gestational age of 29 weeks 0 days – 31 weeks 6 days AND requirement for oxygen >21% for at least the first 28 days after birth) OR nutritional compromise (includes, but is not limited to, patients undergoing stem cell transplantation, chemotherapy) during the RSV season 	 following: Documentation of chronic lung disease (CLD) of prematurity (defined as gestational age ≤ 31 weeks 6 days AND requirement for > 21% oxygen or chronic ventilator therapy for at least the first 28 days after birth) AND required continued medical support (defined as chronic corticosteroid therapy, diuretic therapy, or supplemental oxygen during the 6-month period before the RSV season. Documentation of cystic fibrosis AND one of the following: manifestations of severe lung disease (previous hospitalization for pulmonary exacerbation in the first year of life or abnormalities on chest radiography or chest computed tomography that persists when stable) weight for length < 10th percentile Documentation, chemotherapy, or organ transplants) during the RSV season. 	
Coverage limitations:			
0	o Beyfortus (nirsevimab) is approved for prevention of RSV in newborns and infants in their first RSV season or children 24		
	months of age or younger who are at risk of severe RSV disease in their second season.		
0	Per FDA labeling, children who have received Beyfortus should not receive Synagis for the same RSV season.		
0	If Synagis was administered initially for the season and fewer than 5 doses were administered, the infant should receive 1 dose of Beyfortus. No further Synagis should be administered.		
0	If Synagis was administered in season 1 and the child is eligible for RSV prophylaxis in season 2, the child should receive Beyfortus in season 2, if available. If Beyfortus is not available, Synagis should be administered as previously recommended.		

- Synagis PAs will only be approved for one month at a time, and only if Beyfortus supply is limited.
- Subject to limitations above, PA requests for Synagis will be approved (one month at a time) starting at the onset of RSV season for a maximum of up to 5 doses and a dosing interval not less than 30 days between injections. PA requests will be accepted starting October 15 for dates of service starting November 1.
- Synagis[®] will <u>NOT</u> be authorized for administration prior to November 1; this refers to the typical season and excludes off-season case-by-case authorizations. Synagis[®] dosing authorizations will extend for the recommended number of doses OR until the end of epidemic RSV season as defined by CDC OR until March 31 whichever occurs first. Monthly prophylaxis should be discontinued for any infant or young child who experiences a breakthrough RSV hospitalization.

Prophylaxis in infants with Down Syndrome is not recommended without the presence of one of the criteria listed above.

CRITERIA/ADDITIONAL DOCUMENTATION RSV-SYNAGIS

BENEFICIARY INFORMATION			
Beneficiary ID: DOB:	//		
Beneficiary Full Name:			
RSV-SYNAGIS® CRITERIA/ADDITIONAL DOCUMENTATION*			
PA requests will be accepted starting October 15 for dates of service starting November 1.			
For the typical RSV season, PA requests will be approved (one month at a time) starting at the onset of RSV season on November 1 for a maximum of up to 5 doses, given monthly, per RSV season. A dosing interval <u>not less than 30 days</u> between injections is suggested. Synagis [®] dosing authorizations will extend for the recommended number of doses <i>OR</i> until the end of epidemic RSV season as defined by CDC and/or in consultation with pediatric providers OR March 31 - <i>whichever occurs first</i> . DOM will notify providers if the RSV season is determined to be ended prior to March 31.			
PA REQUEST INFORMATION:			
PHARMACY INFORMATION – Synagis [®] is available through a limited distribution network established by the manufacturer.			
Synagis Dosing Regimen: 15mg/kg IM once a month Product Availability: single dose vial: 50mg/0.5ml, 100mg/1 ml			
Birth Date: Birth Weight: lbsoz.			
NDC#: Current Weight:lbsoz. Date last weighed:			
Did the patient receive Synagis in the hospital? Yes No If "Yes", list date(s) of administration: Can the provider supply and administer Beyfortus? Yes No If "No", please provide an explanation: Has the patient been hospitalized due to RSV at any time since May 1 of this year? Yes No Monthly prophylaxis should be discontinued for any infant or young child who experiences a breakthrough RSV hospitalization.			
Check the criteria used to qualify the patient for Synagis [®] . All information requested on PA
