Preface

This Companion Guide to the Benefit Enrollment and Maintenance (834) adopted under Health Insurance Portability and Accountability Act (HIPAA) clarifies and specifies the data content when exchanging electronically with the State of Mississippi, Division of Medicaid (DOM). Transmissions based on this Companion Guide, used in tandem with the **ASC X12N 834 005010X220 Implementation Guide and the associated addendum 005010X220A1**, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

1. Introduction

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carries provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (DHHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions, primarily between health care providers and plans. HIPAA directs the Secretary to adopt transaction standards enabling the electronic exchange of health information and to adopt specifications for implementing each standard. HIPAA intends to:

- Create better access to health insurance
- Limit fraud and abuse
- Reduce administrative costs

The HIPAA regulations at 45 CFR 162.915 require that covered entities not enter into trading partner agreements that would do any of the following:

- Change the definition, data condition, or use of a data element or segment in a standard
- Add any data elements or segments to the maximum defined data set
- Use any code or data elements that are marked “not used” in the standard’s implementation specification or are not in the standard’s implementation specifications
- Change the meaning or intent of the standards implementation specifications

1.1. Scope

The Companion Guide is to be used with and supplement the requirements in the HIPAA Accredited Standards Committee (ASC) X12 Implementation Guides. Implementation Guides define the national data standards, electronic format, and values for each data element within an electronic transaction. The purpose of the Companion Guide is to provide trading partners with a guide to communicate Mississippi Division of Medicaid (MS DOM) specific information required to successfully exchange transactions.

The Companion Guide is intended for the business and technical users, within or on behalf of trading partners, responsible for the testing and setup of electronic claim status request and response transactions to MS DOM.

1.2. Overview

This section of the Companion Guide will provide guidance for establishing a relationship with Mississippi DOM for the business purpose of exchanging the Benefit Enrollment and Maintenance (834) transaction.

1.3. References

This section specifies additional on-line sources of helpful information related to electronic data interchange and X12 transactions.

1.4. Additional Information

It is assumed that the trading partner has purchased and is familiar with the ASC X12 Type 3 Technical Report (TR3) being referenced in this Companion Guide. TR3s can be purchased from the ASC X12 store at <http://store.x12.org/store/>.

2. Getting Started

2.1. Working with Mississippi DOM

The Electronic Data Interchange (EDI) Department is available to assist trading partners when questions arise. See [Section 5](#) for details.

2.2. Trading Partner Registration

Trading Partner registration is completed through the secure provider portal. All required fields must be completed, and an electronic signature must be included.

2.3. Certification and Testing Overview

All covered entities who submit electronic transactions are required to certify. This includes Clearing houses, Software Vendors, Provider Groups, and Coordinated Care Organizations (CCOs). Such agencies certify users who submit transactions through them on their behalf. Users who submit transactions directly must be certified. Users who submit transactions through CCOs should receive certification requirement information from the CCO.

3. Testing with the Payer

Testing is not required for Benefit Enrollment and Maintenance (834).

4. Connectivity with the Payer/Communications

Users can register to access the provider portal in order to upload EDI files.

To register/logon to the provider portal, visit: [Mississippi Medical Assistance Portal for Providers > Home \(msxix.net\)](#).

Submission of EDI Transactions via MOVEit, go to: [Mississippi Replacement Project \(msxix.net\)](#)

4.1. Passwords

Passwords are provided during initial enrollment and can be reset by contacting Provider Relations – Electronic Claims Submission (ECS) Department at 1 800-884-3222. These passwords may not be shared.

5. Contact Information

In an effort to assist the community with their electronic data exchange needs, MS DOM has the following options available for either contacting a help desk or referencing a website for further assistance:

- For general information go to Mississippi DOM Website: [EDI Technical Documents | Mississippi Division of Medicaid \(ms.gov\)](#)
- For EDI Services (technical, enrollment, or setup questions):
 - E-mail: MS.EDI.Helpdesk@gainwelltechnologies.com
 - Telephone: 1 800-884-3222
 - Hours are Monday through Friday from 08:00 AM to 05:00 PM CST.

6. Payer Specific Business Rules and Limitations

Payer specific business rule information regarding MS DOM can be found at the “For Our Providers” webpage on the MS DOM website, , [Providers | Mississippi Division of Medicaid \(ms.gov\)](#).

7. Acknowledgements and/or Reports

No acknowledgements are expected for the 834 transactions.

8. Trading Partner Agreements

An Electronic Data Interchange (EDI) Trading Partner is defined as any MS DOM customer (provider, billing service, software vendor, employer group, financial institution, etc.) that transmits to or receives electronic data from MS DOM.

Payers have EDI Trading Partner Agreements (TPAs) that accompany the standard Implementation Guide to ensure the integrity of the electronic transaction process. The Trading Partner Agreement is related to the electronic exchange of information, whether the agreement is an entity or a part of a larger agreement, between each party to the agreement.

9. Transaction-Specific Information

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA are detailed in a table. The tables contain a row for each segment that has additional information MS DOM provides that can:

1. Limit the repeat of loops, or segments
2. Limit the length of a simple data element
3. Specify a sub-set of the IGs internal code listings
4. Clarify the use of loops, segments, composite, and simple data elements
5. Any other information tied directly to a loop, segment, composite, or simple data element pertinent to trading electronically with MS DOM

In addition to the row for each segment, one or more additional rows are used to describe Mississippi DOM usage for composite and simple data elements and for any other information. Notes and comments should be placed at the deepest level of detail. For example, a note about

a code value should be placed on a row specifically for that code value, not in a general note about the segment.

All Mississippi DOM clients are considered “subscribers,” so they all have individual loops. See the Implementation Guide for additional information.

9.1. Naming Your Files

When downloading batch files, the submitter files will be in the following format, example [277CA](#), 820, 834, 835, TA1, 999:

- [TP01234567_YYYYJJJ_\(9 digit sequence\).277CA](#)
 - TP01234567_YYYYJJJ_(9 digit sequence).820
 - TP01234567_YYYYJJJ_(9 digit sequence).820
 - TP01234567_YYYYJJJ_(9 digit sequence).834
 - TP01234567_YYYYJJJ_(9 digit sequence).835
 - TP01234567_YYYYJJJ_(9 digit sequence).TA1
 - TP01234567_YYYYJJJ_(9 digit sequence).999
- *Where YYYYJJJ is the 4-digit year and 3-digit Julian day.

10. Conventions

Most of the companion guide is in table format (see example below). Only loops, elements, or segments with clarifications or comments are listed. For further information, please see the TR3 for each transaction.

Table 1. Conventions Sample

Table 2. Conventions Fields

Column Name	Description
Loop ID	Loop, header, or trailer.

Column Name	Description
Segment/Element Reference	Segment or Element ID.
Loop Name	Name of Loop, header, or trailer.
Codes	Code values.
Note/Comments	Comments or clarifications for Mississippi DOM. Values, data length, and repeats are also listed here. Clarifications in field length only indicate what Mississippi DOM uses or returns to process the transaction. MS DOM still accepts the minimum and maximum field lengths required by the Technical Report Type 3 (TR3) for each element.
