Preface

This Companion Guide to the Health Care Claims (837s) adopted under Health Insurance Portability and Accountability Act (HIPAA) clarifies and specifies the data content when exchanging electronically with the State of Mississippi, Division of Medicaid (DOM) Transmissions based on this Companion Guide, used in tandem with the **ASC X12N 837 005010X224 and the associated addendums 005010X224A1 and 005010X224A2 Implementation Guides**, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

1. Introduction

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carries provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (DHHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions, primarily between health care providers and plans. HIPAA directs the Secretary to adopt transaction standards enabling the electronic exchange of health information and to adopt specifications for implementing each standard. HIPAA intends to:

- Create better access to health insurance

- Limit fraud and abuse

- Reduce administrative costs

The HIPAA regulations at 45 CFR 162.915 require that covered entities not enter into trading partner agreements that would do any of the following:

- Change the definition, data condition, or use of a data element or segment in a standard

- Add any data elements or segments to the maximum defined data set

- Use any code or data elements that are marked "not used" in the standard's implementation specification or are not in the standard's implementation specifications

- Change the meaning or intent of the standards implementation specifications

1.1. Scope

The Companion Guide is to be used with and supplement the requirements in the HIPAA Accredited Standards Committee (ASC) X12 Implementation Guides. Implementation Guides define the national data standards, electronic format, and values for each data element within an electronic transaction. The purpose of the Companion Guide is to provide trading partners with a guide to communicate Mississippi Division of Medicaid (MS DOM) specific information required to successfully exchange transactions.

The Companion Guide is intended for the business and technical users, within or on behalf of trading partners, responsible for the testing and setup of electronic claim status request and response transactions to MS DOM.

1.2. Overview

The Companion Guide provides guidance for establishing a relationship with MS DOM for the business purpose of doing Health Care Claims (837s).

1.3. References

This section specifies additional on-line sources of helpful information related to electronic data interchange (EDI) and X12 transactions.

1.4. Additional Information

It is assumed that the trading partner has purchased and is familiar with the ASC X12 Type 3 Technical Report (TR3) being referenced in this Companion Guide. TR3s can be purchased from the ASC X12 store at http://store.x12.org/store/.

2. Getting Started

2.1. Working with Mississippi DOM

The Electronic Data Interchange (EDI) Department is available to assist trading partners when questions arise. See Section 5 for details.

2.2. Trading Partner Registration

Trading Partner registration is completed through the secure provider portal. All required fields must be completed, and an electronic signature must be included.

2.3. Certification and Testing Overview

All covered entities who submit electronic transactions are required to certify. This includes Clearing houses, Software Vendors, Provider Groups, and Coordinated Care Organizations (CCOs). Such agencies certify users who submit transactions through them on their behalf. Users who submit transactions directly must be certified. Users who submit transactions through CCOs should receive certification requirement information from the CCO.

3. Testing with the Payer

This section contains a detailed description of the testing phase. Testing is required for the Health Care Claims (837). Before exchanging production transactions with MS DOM, each trading partner must complete production authorization testing. Trading partner testing includes HIPAA compliance testing as well as validating the use of conditional, optional, and mutually defined components of the transaction.

To obtain approval for Production from Mississippi DOM, trading partners are recommended to submit five unique requests, but not to exceed 25 successful and unique submissions and receive the associated 999 (accepted) acknowledgement in response and validate adjudication by downloading and reviewing 835 Electronic Remittance Advice (ERA) in order to obtain approval from Mississippi DOM to promote to Production.

Trading Partner Authorization Testing is detailed in the Trading Partner Profile Testing Packet for ASC X12 transactions available on the MS DOM Training Portal (EDI Technical Documents | Mississippi Division of Medicaid (ms.gov)) — click on the MOVEit Portal at Mississippi Replacement Project (msxix.net) page.

Questions may be directed to the EDI Helpdesk at 1 800-884-3222 or via the "Contact Us" link at the top of the Portal home page at: Mississippi Medical Assistance Portal for Providers > Home (msxix.net).

4. Connectivity with the Payer/Communications

Users can register to access the provider portal in order to upload EDI files.

To register/logon to the provider portal, visit: Mississippi Medical Assistance Portal for Providers > Home (msxix.net).

Submission of EDI Transactions via MOVEit, go to: Mississippi Replacement Project (msxix.net)

4.1.   Passwords

Passwords are provided during initial enrollment and can be reset by contacting Provider Relations – Electronic Claims Submission (ECS) Department at 1 800-884-3222. These passwords may not be shared.

5.   Contact Information

In an effort to assist the community with their electronic data exchange needs, MS DOM has the following options available for either contacting a help desk or referencing a website for further assistance:

- For general information go to Mississippi DOM Website: EDI Technical Documents | Mississippi Division of Medicaid (ms.gov)

- For EDI Services (technical, enrollment, or setup questions):
  - E-mail: MS_EDI_Helpdesk@gainwelltechnologies.com
  - Telephone: 1 800-884-3222
  - Hours are Monday through Friday from 08:00 AM to 05:00 PM CST.

6.   Payer Specific Business Rules and Limitations

Payer specific business rule information regarding MS DOM can be found at the "For Our Providers" webpage on the MS DOM website, Providers | Mississippi Division of Medicaid (ms.gov).

7.   Acknowledgements and/or Reports

The acknowledgement process will create the TA1 and 999 acknowledgement responses for the inbound transactions.

8.   Trading Partner Agreements

An Electronic Data Interchange (EDI) Trading Partner is defined as any MS DOM customer (provider, billing service, software vendor, employer group, financial institution, etc.) that transmits to or receives electronic data from MS DOM.

Payers have EDI Trading Partner Agreements (TPAs) that accompany the standard Implementation Guide to ensure the integrity of the electronic transaction process. The Trading Partner Agreement is related to the electronic exchange of information, whether the agreement is an entity or a part of a larger agreement, between each party to the agreement.

9. Transaction-Specific Information

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA are detailed in a table. The tables contain a row for each segment that has additional information MS DOM provides that can:

1. Limit the repeat of loops, or segments

2. Limit the length of a simple data element

3. Specify a sub-set of the IGs internal code listings

4. Clarify the use of loops, segments, composite, and simple data elements

5. Any other information tied directly to a loop, segment, composite, or simple data element pertinent to trading electronically with MS DOM

In addition to the row for each segment, one or more additional rows are used to describe MS DOM usage for composite and simple data elements, and any other necessary information. Notes and comments should be placed at the deepest level of detail. For example, a note about a code value should be placed on a row specifically for that code value, not in a general note about the segment.

All MS DOM members are considered "subscribers," so they all have individual loops. See the Implementation Guide for additional information. Dependent loops for eligibility transactions will not be processed.

9.1. Naming Your Files

When uploading batch files, the submitter can name their files using the following format for processing and tracking purposes:

1. <SubmitterId> – Use the trading partner ID (submitter ID) assigned. This is to be used by all providers, vendors, and clearinghouses submitting batch transactions.

2. <filetype> – Assign a file type – preferably transaction type, example 270, 276, 278Q, 837D, 837I, 837P.

3. <datetime>. – Use the date/time value format of yyyymmddhhmm to uniquely identify the file and avoid duplicate files.

4. <filetypeext> – Use the file type extension to identify the file type (e.g. .txt)

Here are some examples of good file naming standards:

- TP01234567_837D_201708301140512.txt
- TP01234567_837D_TRANS01_20170830.txt
- TP01234567_837D_SMALL_FILE_2017_08.txt

When downloading batch files, the submitter files will be in the following format, example 271, 277, 278R, 835, TA1, 999:

- TP01234567_YYYYJJJ_(9 digit sequence).271
- TP01234567_YYYYJJJ_(9 digit sequence).277
- TP01234567_YYYYJJJ_(9 digit sequence).278R
- TP01234567_YYYYJJJ_(9 digit sequence).835
- TP01234567_YYYYJJJ_(9 digit sequence).TA1
- TP01234567_YYYYJJJ_(9 digit sequence).999
  *Where YYYYJJJ is the 4-digit year and 3-digit Julian day.

10.   Conventions

Most of the companion guide is in table format (see example below). Only loops, elements, or segments with clarifications or comments are listed. For further information, please see the TR3 for each transaction.

Table 1.   Conventions Sample

Loop ID	Segment/ Element Reference	Loop Name	Codes	Notes/Comments
	837D	**Health Care Claim Dental**		
	BHT	**Beginning of Hierarchical Transaction**		
	BHT02	Transaction Set Purpose Code	00, 18	00 – Original 18 – Reissue For CCOs, use 00 - Original.
	BHT06	Transaction Type Code	CH, RP	CH – Chargeable (Fee for Service)
1000A	**NM1**	**Submitter Name**		
	NM101	Entity Identifier Code	41	41 – Submitter
	NM102	Entity Type Qualifier		*Refer to TR3*
	NM103	Submitter Last Name or Organization Name		"ADVANTAGE/MEDICARE-PART-C" for Medicare Advantage/ Part-C Claims" should ONLY be used for Medicare (Part A, Part B, Part C or Part D) claims.
	NM109	Submitter Identifier	Trading Partner ID	Value is Trading Partner ID that was provided during the EDI enrollment process

Table 2.   Conventions Fields

Column Name	Description
Loop ID	Loop, header, or trailer.
Segment/Element Reference	Segment or Element ID.
Loop Name	Name of Loop, header, or trailer.
Codes	Code values.
Note/Comments	Comments or clarifications for Mississippi DOM. Values, data length, and repeats are also listed here. Clarifications in field length only indicate what Mississippi DOM uses or returns to process the transaction. MS DOM still accepts the minimum and maximum field lengths required by the Technical Report Type 3 (TR3) for each element.

10.1. Transaction 837, Health Claim: Dental

Table 3. Health Care Claim Dental (837D)

	SBR09	Claim Filing Indicator Code	MC	MC - Medicaid For CCOs, use MC – Medicaid
2010BA	NM1	**Subscriber Name**		
	NM101	Entity Identifier Code	IL	IL - Insured or Subscriber

Loop ID	Reference	Name	Codes	Notes/Comments
	NM109	Subscriber Primary Identifier		Value is 9-digit Mississippi Division of Medicaid Recipient/Beneficiary ID. This field can be ten characters long if you are including your co-pay indicator
	N3	**Subscriber Address**		**Required; Subscriber Address details**
	N4	**Subscriber City, State, Zip Code**		**Required; Subscriber City, State, Zip code**
	DMG	**Subscriber Demographic Information**		**Required; Subscriber Demographic details**
	REF02	**Subscriber Secondary Supplemental Identifier**		
2010BB	**NM1**	**Payer Name**		
	NM101	Entity Identifier Code	PR	PR – Payer
	NM102	Entity Type Qualifier	2	2 – Non-Person Entity
	NM103	Payer Name		MISSISSIPPI DIVISION OF MEDICAID
	NM108	Identification Code Qualifier	PI, XV	PI - Payor Identification XV - Centers for Medicare and Medicaid Services Plan ID
	NM109	Payer Identifier	MS_TXIX	MS_TXIX - Mississippi Title 19
	REF	**Billing Provider Secondary Identification**		**Required only for atypical, non-healthcare providers who are unable to obtain an NPI for NM109, and use an identification number other than NPI for the receiver to identify the Provider**
	REF01	Reference Identification Qualifier	G2	G2 - Provider Commercial Number
	REF02	Billing Provider Secondary Identifier		Indicate the Mississippi Division of Medicaid provider number For atypicals and Non-Par provider is required where an NPI is not assigned For CCOs, provider is required For Crossover claims, REF02 will contain the Billing Provider's Medicaid ID number
2000C		**PATIENT HEIRARCHICAL LEVEL**		**Mississippi DOM does not use information in the Patient Loop since the subscriber is always the patient. Any Claims received with a patient loop (2000C) will be returned**
2300	**CLM**	**Claim Information**		

Loop ID	Reference	Name	Codes	Notes/Comments

Appendix A. Medicare Cross Over Claim Segment Examples

The logic differs depending on the 837 claim type.

1) There is no specific claim type logic for 837Ds. D = Dental Claim.

2) For 837Ps, the claim type is initially set to M = Professional Claim.

   If 2320 SBR09= MA (Medicare Part A) or MB (Medicare Part B) or 16 (Medicare Part C) and 2320 or 2430 CAS01 = PR and CAS02, 05, 08, 11, 14, or 17 = 1 or 2 or 3 or 122

   OR

   If 2320 SBR09 = MA, MB, or 16 & 2320 AMT01=D and AMT02 > 0

   Then the claim type is set to B = Professional Crossover claim type.

3) For 837I, the logic is similar to the 837P in that it still checks a) SBR09 for MA, MB, or 16, b) 2320 or 2430 CAS01 = PR and CAS02, 05, 08, 11, 14, or 17 = 1 or 2 or 3 or 122, and c) 2320 AMT01=D & AMT02 > 0.

   The difference is that it also must consider the 2300:CLM05-1 value when determining whether to set claim types to A = Inpatient Crossover or C = Outpatient Crossover.

   - If CLM05-1 is = 11, 15, 16, 17 or 18 and Loop 2320 and SBR09 = MA, MB, or 16 and Loop 2320 or 2430 CAS01=PR and CAS02, 05, 08, 11, 14 or 17 = 1, 2, 3 or 66; or CLM05-1 is = 11, 15, 16, 17 or 18, and Loop 2320 SBR09 = MA, MB, or 16 and AMT02 >0 where AMT01=D, set claim type to A = Inpatient Crossover

   - If CLM05-1 is = 12,13,14,19,22,23,24,29,31, or greater than 35 (except 65, 66, 86 and 89) and Loop 2320 SBR09 = MA, MB, or 16 and Loop 2320 or 2430 CAS01=PR and CAS02, 05, 08, 11, 14 or 17 = 1, 2, 3 or 66; or CLM05-1 is = 12,13,14,19,22,23,24,29,31, or greater than 35 (except 65 and 66) and Loop 2320 SBR09 = MA, MB, or 16 and AMT02 >0 where AMT01=D, set claim type to C = Outpatient Crossover

   - If CLM05-1 is = 21, 25, 26, 27, 28, 65, 66, 86 or 89 and Loop 2320 SBR09 = MA, MB, or 16 and Loop 2320 or 2430 , CAS01=PR and CAS02, 05, 08, 11, 14 or 17 = 1, 2, 3 or 66; or CLM05-1 is = 21, 25, 26, 27, 28, 65, or 66 and Loop 2320 SBR09 = MA, MB, or 16 and AMT02 >0 where AMT01=D, set claim type to A = Inpatient Crossover

   - If CLM05-1 is = 32, 33, or 34 and Loop 2320 SBR09 = MA, MB, or 16 and Loop 2320 or 2430 , CAS01=PR and CAS02, 05, 08, 11, 14 or 17 = 1, 2, 3 or 66; or CLM05-1 is = 11, 15, 16, 17 or 18, and Loop 2320 SBR09 = MA, MB, or 16 and AMT02 >0 where AMT01= D, set claim type to C = Outpatient Crossover
